RE: Forage species management

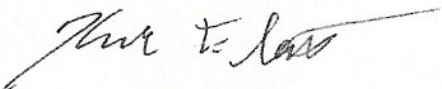

Dear Mr. Bonham,

The Monterey National Marine Sanctuary Advisory Council (SAC) has, over the course of this year, sought to better understand the role of forage species in the Sanctuary and greater ecosystem, and also to understand the science used in their management. The SAC has heard a number of presentations from scientists and fishery managers, as well as reviewed a "white paper" on forage species that was prepared by Oceana and Audubon-California representatives on the SAC's Conservation Working Group. We heard presentations from Josh Lindsay, NOAA Fisheries; Deb Wilson-Vandenberg, DFG; David Crabbe, PFMC Councilmember; and, Dr. Julie Thayer, Farallon Institute for Advanced Ecosystem Research and considered comments received from Dr. Richard Parrish, Fisheries Biologist. The SAC also reviewed the June 24, 2012 Pacific Fishery Management Council motion regarding forage species and the policy adopted on November 7, 2012 by the California Fish and Game Commission.

Based on this information, the SAC supports the policies on forage species recently adopted by the California Fish and Game Commission and the Pacific Fishery Management Council. The MBNMS SAC appreciates the important role that forage species play in the California Current ecosystem and supports the continuing development and use of the best available science in their management by the appropriate fishery management agency.

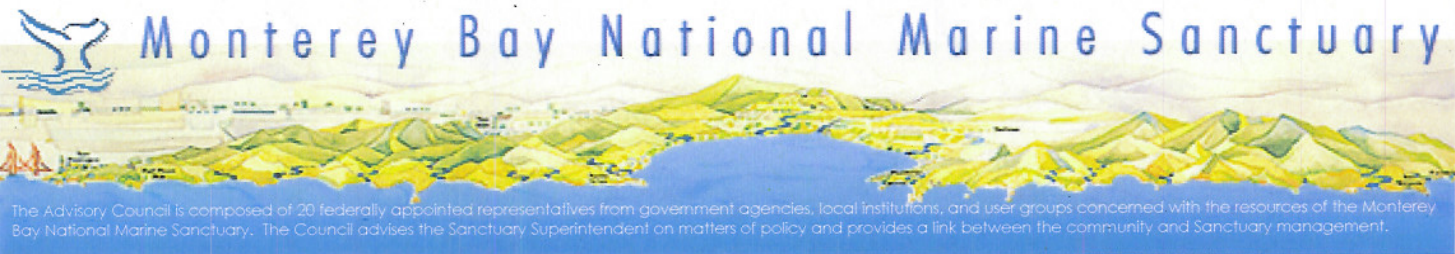

Thank you

Sincerely,

Kirk Schmidt
Chair

RE: Forage species management

Dear Mr. Kellogg,

The Monterey National Marine Sanctuary Advisory Council (SAC) has, over the course of this year, sought to better understand the role of forage species in the Sanctuary and greater ecosystem, and also to understand the science used in their management. The SAC has heard a number of presentations from scientists and fishery managers, as well as reviewed a "white paper" on forage species that was prepared by Oceana and Audubon-California representatives on the SAC's Conservation Working Group. We heard presentations from Josh Lindsay, NOAA Fisheries; Deb Wilson-Vandenberg, DFG; David Crabbe, PFMC Councilmember; and, Dr. Julie Thayer, Farallon Institute for Advanced Ecosystem Research and considered comments received from Dr. Richard Parrish, Fisheries Biologist. The SAC also reviewed the June 24, 2012 Pacific Fishery Management Council motion regarding forage species and the policy adopted on November 7, 2012 by the California Fish and Game Commission.

Based on this information, the SAC supports the policies on forage species recently adopted by the California Fish and Game Commission and the Pacific Fishery Management Council. The MBNMS SAC appreciates the important role that forage species play in the California Current ecosystem and supports the continuing development and use of the best available science in their management by the appropriate fishery management agency.

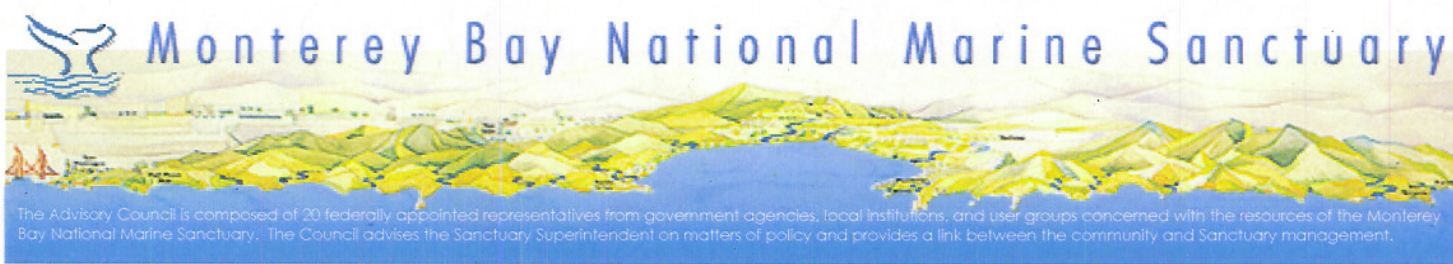

Thank you

Sincerely,

Kirk Schmidt,
Chair

"The council is an advisory body to the Sanctuary Superintendent. The opinions and findings of this publication do not necessarily reflect the position of the Monterey Bay National Marine Sanctuary and the National Oceanic and Atmospheric Administration."

The Advisory Council is composed of 20 federally appointed representatives from government agencies, local institutions, and user groups concerned with the resources of the Monterey Bay National Marine Sanctuary. The Council advises the Sanctuary Superintendent on matters of policy and provides a link between the community and Sanctuary management.
